Task 9

Deployed at: https://salty-hollows-88312.herokuapp.com/

Gitlab Repo: https://gitlab.com/MrJimBeam/task-9

PokemonList Component

This component calls custom pokemon fetch service for 25 pokemons at a time, and calls second pokemon fetch service to put pokemon name and pic url of each pokemon in a list. These values are passed to PokemonListItem. It also contains a function to load next 25 pokemons with pagination.

PokemonListItem Component

This component values passed from the above component and renders pokemon cards with a picture and name. It also routes each card to "/pokemon/"name" page.

PokemonDetail Component

This component is routed as "/pokemon/"name", where it takes the name parameter as and ID and does single pokemon data fetching. Then it processes data at sends to underlaying components.

PokemonStats Component

This component takes the passed data from PokemonDetail and displays correctly formatted base stats, name and all of the available sprites for the pokemon. It also has a button routed to the main page.
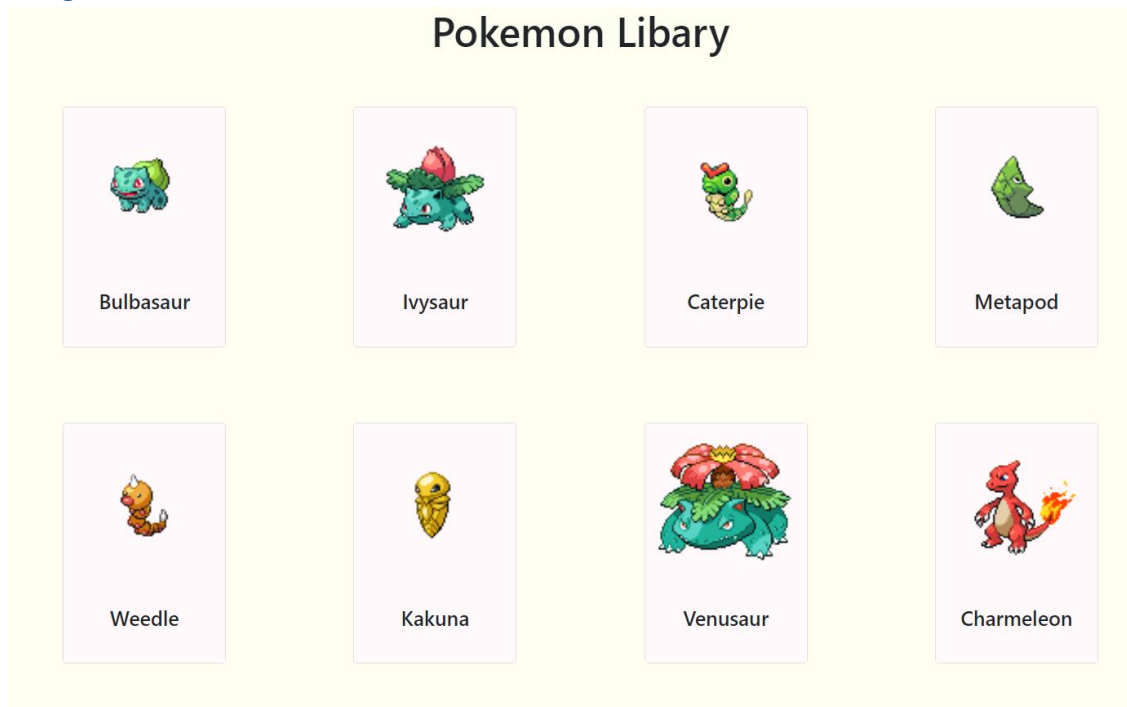

PokemonProfile Component

This component takes the passed data from PokemonDetail and displays correctly formatted Height, Weight, Abilities and base experience.
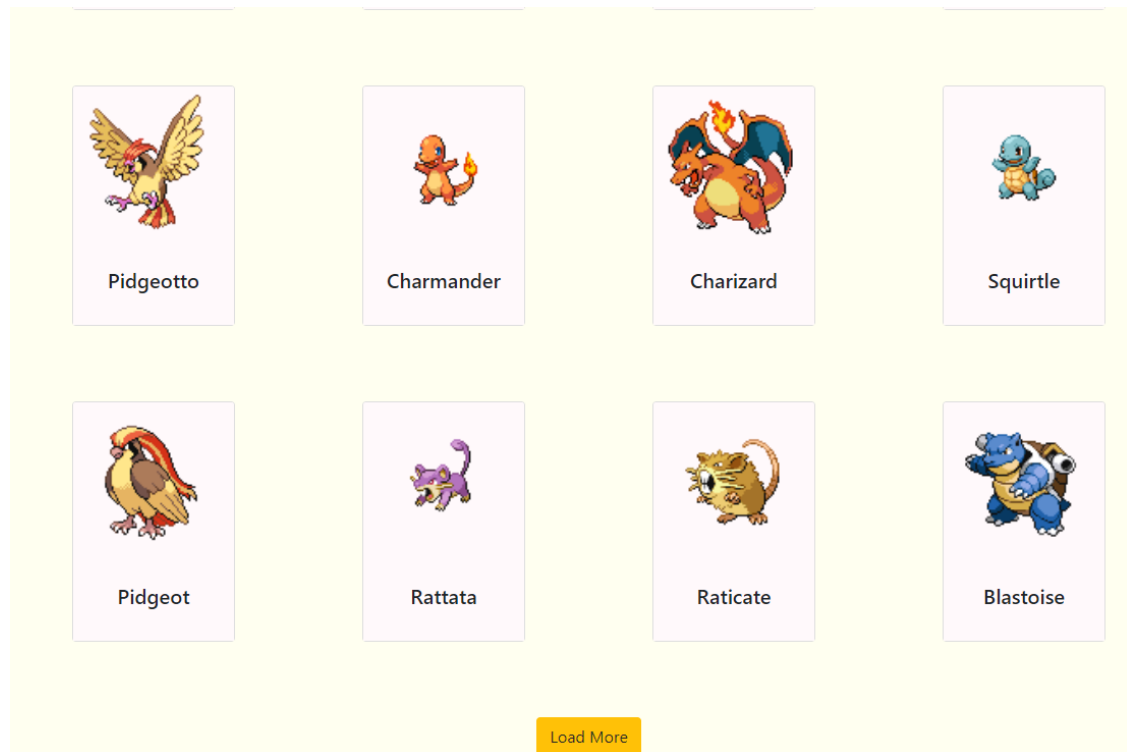

PokemonMoves Component

This component takes the passed data from PokemonDetail and displays correctly formatted list of pokemon moves.
